

Murray Wireless

To connect to our wireless network:

1. Open your wireless network settings on your personal device.
2. Choose "MISD Wireless".
3. Open your web browser (Internet Explorer, Firefox, Chrome or Safari... whatever you use) and browse to any site other than a Murray Independent Schools site (google.com works nicely).
4. Click on the link "Please click here to connect to the network".
5. You will come to the page that says at the top "Murray Independent Registration Center". Scroll to the bottom of the page and enter your network username and password if you have an account (if you do not have an account, choose 'Guest Access')
6. Click the "Login" button.
7. On the following page read the AUP and click on the check box "I Agree to the Terms of the Acceptable Use Policy".
8. Click "Complete Registration".
9. There will be about a 20 to 30 second wait while your device and user account are registered to our system.
10. Once the process is over you will be redirected to our district homepage.

Users who register their username along with their device will only have to do this once per year per device. Users who do not register a username with a device will have to follow this process every time they connect. Users can register by default up to three personal devices.
